FRONT COVER FEATURE

On-site commissioning by Cooling Edge

NO COOLING OFF PERIOD IN GLASGOW!

Gryffe Garage recently purchased a Cooling Edge CTR Astra machine from Unipart in Glasgow to continue their successful growth strategy.

Brian and Alister launched the proposition by offering customers a simple air conditioning diagnostic check for between £10 + £20. This enabled their customer base to learn about the importance of air conditioning recharging and soon the recharges started to get booked in.

Gryffe Garage charge around £49 for a full recharge and like the fact that they can go and do other jobs while the recharge is taking place. They anticipate doing at least one full recharge a day at £49 and grossing at least £10,000 annually.

The marketing pack is helping them achieve these numbers and they would recommend this proposition to similar forward thinking independent garages.

Did you know?....

95% of all production vehicles are fitted with standard air conditioning or climate control

All car air conditioning system loose between 5 and 10% refrigerant through natural leakage per year. So an annual recharge is required to maintain optimum performance.

Up to 40% of all cars will require a replacement condenser within the first 5 years of motoring.

Purchasing a Cooling Edge Air Con Equipment Package is one of the fastest returns on initial investment.

The material cost to recharge an air con system on average is less than £5.00 per vehicle.

Double your Profit – Whilst servicing an air conditioning system with an automatic machine, other service work can be carried out at the same time within the workshop.

Legislation requires all technicians to hold a licence to handle the refrigerant and use the air conditioning service station.
Onsite training available through Unipart Automotive.

Offering an air conditioning service to your customers will enable you to offer a more complete service back up to your customers.

Available from only £10.50 per week on a 5 year lease

Lift Now Available In Yellow

The SF 8909 is a broad application electro-mechanical 2 post lift. It is suitable for lifting most passenger cars, car derived vans and many light commercial vehicles up to a gross weight of 3000kg. The SF 8909 has a heavy duty column design fabricated from high grade steel and powerful 4kw motor synchronised with the slave column via a mechanical chain drive. The lifts load and safety nuts are manufactured from resilient Nylatron and work in conjunction with the precision engineered cold rolled screw. Minimum floor requirements for installation are a level 150mm thickness of C25 concrete. The floor must be flat and levelled with a 10mm tolerance.

100mm (TECOA50734)
set of 4 high lift pads set
only ~~£229+vat~~

NOW ONLY £129
When ordered with this lift!

Key Features

- Automatic arm locking
- 5 Year warranty on self lubricating Nylatron operating and safety nuts
- Low minimum lifting pad height of just 95mm
- Foot/toe protection
- Heavy duty base-frame
- 3 phase supply only
- Maximum Lifting Time 55 secs

3D WHEEL ALIGNER

V3D GEOLITE FAST ACCURATE EASY PROFITABLE

HOFMANN

5 YEAR LEASE FROM

£41.99pw

SPECIAL OFFER £7999

Part No: **HOFGEOLITE**

Professional Wheel Alignment

The V3D Geolite is an entry level 3D car and LGV aligner featuring efficient camera technology with a moveable camera beam, to follow the ramp. This wheel aligner comes with a TFT flat panel 19" screen and entry level software.

The V3D Geolite provides accurate, real-time measurements that reduce setup and measurement times while generating serious productivity benefits. Less time more profit!

Simple to use and a great space-saving design, this aligner is great for small shops too.

Key Features

- With movable camera beam support (lift - flexible working height 0-2 m)
- Control terminal with shelves for printer and PC and additional storage space
- 19" TFT Flat monitor
- PC with Windows operating system and standard user software
- Set of 4 universal wheel clamps - clamping range 11" - 22"
- Colour printer
- Built in loud speakers
- Power supply 230 V 50/60 Hz
- Simple operation and quick accurate measured results
- Complete and up-to-date OEM specs
- 3D overall display
- Cordless communication between targets and camera system
- Standard accessories: brake pedal lock, steering wheel holder

COMES WITH 2 YEAR PARTS & LABOUR WARRANTY

UNIPART AUTOMOTIVE Garage Equipment Services

UNIPART AUTOMOTIVE Garage Equipment Services

Your Complete Service Package!

Garage Equipment Services total service package provides specialist advice on workshop, commercial vehicle and body shop layouts, adherence to legislation and full installation procedures, all managed within a customer's timetable and budget requirements.

GES can provide specialist one-stop-shop business solutions, delivering a full consultation process to customers from 'concept to reality'.

The right appearance and working environment is essential to drive your business forward. It creates greater customer confidence, increases efficiency and well being amongst your Technicians and helps keep running costs under control.

GES offer the total package:

- We take care of design, planning and legislation concerns
- We optimise the layout and provide full installation
- We keep to your timescale and budget

From workstations and MOT bays to Greenfield site developments, you benefit from the exceptional technical expertise, of over 25 years experience from the major specialist distributor offering:

- Full project management from conception to completion
- Quality branded products with manufacturer warranties
- Flexible payment plans

GES has a vast portfolio of branded products, which ensures it can live up to its claim of being able to source everything from a spanner to spray booth.

Together we choose the most suitable solution for you and with many items supplied from our large central warehouse, we can ensure delivery just when it's needed.

Most major items of capital equipment will be installed by the manufacturer's own trained engineers. Smaller equipment (new or existing) can be fitted, re-sited and renovated as necessary, using our own network of approved installers.

We check everything they do, ensuring it is up to GES guaranteed standards of workmanship. Advice is available for ongoing service and maintenance plans can be arranged

As a member of the highly respected Unipart Group, you can be sure our understanding of the automotive market plays a key part in providing excellence, efficiency and economy for your business.

GES work with architects, planners and you, to create the best arrangement for your business, whatever it's size and potential. At this most important stage, we consider both your immediate and future aims and endeavour to look after everything you may need:

- Workshop size related to vehicle throughput
- Design of reception areas
- Equipment and storage specifications
- Maximum use of space, using mezzanines
- Vehicle parking, customer viewing areas
- Height restrictions on lifts plus concrete and floor strengths
- Electrical consumption and rates
- Electrical /air/oil line design including compressor size
- Overall ergonomics and location of common equipment/tools
- Appearance and presentation
- Health and Safety
- Fully detailed MOT drawings for application and approval

We supply the options that provide efficiency within your workshop area, devising the final layout to blend with the way you want to work. Air/oil line, electrical and minor civil works are designed in and full installation costs estimated. Drawings for MOT applications can be provided.

A GES Project Manager controls every aspect of construction and installation, providing a single point of contact for liaison with architects, builders, equipment manufacturers, DOT inspectors and you. It's someone you can trust for advice and help on equipment queries and installation throughout the project.

Flexible finance plans help spread the capital cost, if required, and can incorporate service and after care packages that help you maintain the excellence and efficiency of your new resource with optimum economy.

For more information on how GES can assist with your business growth, please contact us on

0121 329 1154

All Diagnostics come with a 3 year warranty

Check TPMS Service

Approximately 10% of cars in the EU currently have a form of TPMS

From now until November 2014 manufacturers will be introducing TPMS. Continental VDO are world leaders in this technology, so that you can have confidence and knowledge that this aftermarket service tool has been designed from the manufacturers holistic view.

The VDO Autodiagnos Check TPMS tool is cost effective, easy to use and will get you into diagnostics without breaking the bank or blowing your mind! It gives you exceptional service function capability as well as being able to programme electronic tyre valves on a wide range of vehicles.

Ideal for MoT Centres and Fast-Fit, it does all that you want fearlessly!

The tool has superb ABS, SRS, Service, TPMS, EPB & Injection Configuration functions and has plenty of extra capabilities and coverage over and above your Multi Tester Pro giving you:

EOBD
Someone hogging the main diagnostic tool all day?
Airbags
Got an airbag warning light on & need to find out what's wrong?
Climate Control
Are you a Bodyshop that works on crunched cars with air con faults? Read & clear them now!
ABS
Need to read & clear ABS codes?
Common Rail Injectors
Engine running rough? Feeling the hump?
Battery Diagnostics
Battery management - new battery adaption
EPB
Need to release brake calpers on cars with EPB
Service Reset
Don't send the car back to the main dealer to re-set a service light!
DSG Gearboxc
Missing a gear or two? Get it solved without an expensive strip-down for no reason
Stearing Angle Sensors
Tyre, bodyshops & service garages alike - add another string to your bow
Tyre Pressure Monitoring
replace and reprogramme TPMS valves

- Viton Seals
- Stainless Steel Pump Plunger

Part No: **LUMXXXXXX**

SMOKEPRO

SMOKEPRO TOTAL TECH

The Smokepro is simply connected to the vehicle battery and compressed air, a small volume of air is injected into the Air inlet, Vacuum or exhaust at very low pressure, if a leak is present the smoke can be switched on, this injects an oil vapour (smoke) around the area being tested and the smoke can be easily seen leaking from the failed part. A bright halogen lamp highlights the smoke and assorted caps enable various pipes and outlets to be blocked.

ONLY £599

REDUCED TO CLEAR

Features include:

- World's best selling diagnostic leak detector
- Traces air leaks in seconds
- Delivers OEM approved smoke technology
- Thirty day money back guarantee
- Creates dense smoke in seconds
- Two gauges to determine a leak is present before using smoke to detect leak
- Locates EVAP, vacuum & exhaust leaks in seconds
- No nitrogen required, no glow plug, Air safe design.
- Minimum ongoing costs, runs on mineral oil
- Saves money on diagnostic time
- Earns money by locating faults that are effecting engine efficiency and reducing MPG.
- Used regularly, it pays for itself in one month.
- Comes complete with all accessories, halogen lamp, assorted caps, exhaust cone, mineral oil, shreader valve tool.

WHY SKIM DISCS & DRUMS?

- Offer better brakes and improve your bottom line
- Skim discs when changing pads to ensure perfect brakes
- No need to run discs or drums down to the engineering shop and wait!
- Eliminate brake vibration issues and stop them returning permanently
- Reclaim corroded discs and bring them back to life
- Some discs are very expensive to replace
- Eliminate noisy brakes (that dreaded squeak and squeal)
- Fits most vehicles (99%) from a Fiesta to a 7.5 tonne truck
- Approved by virtually every vehicle manufacturer including: Mercedes Benz, Toyota, Nissan, Mazda, Suzuki, to name a few!
- Avoid stripping hubs on light commercials like Transits etc.

COSTS LESS THAN £1 PER DISC OR DRUM!

3/8" IMPACT WRENCH

SPECIAL OFFER
£179
Part No: **CPT7729**

FEATURES
- Compact impact wrench for general maintenance
- Twin hammer clutch
- Composite handle & magnesium clutch housing
- Side to side easy forward/reverse & 3 positive power settings
- Full teasing trigger

BENEFITS
- The most powerful 3/8" of its class for general maintenance
- Maximises operator comfort with an extremely light and well balanced design
- Most convenient and unique reverse technology in the market

1/2" IMPACT WRENCH

SPECIAL OFFER
£119
Part No: **CPT7732**

FEATURES
- Ultra compact impact wrench
- Durable impact mechanism housing made of steel and aluminium
- One hand trigger operation for forward/reverse, 3 setting positions in both directions
- Only 112mm (4.4")

BENEFITS
- Best power to weight ratio: 450 ft-lbs / 610 Nm
- Ultra compact
- Easy to use for either left or right handed operators
- Rugged and lightweight

1/2" IMPACT WRENCH

SPECIAL OFFER
£149
Part No: **CPT7748**

FEATURES
- Composite impact wrench
- Full teasing trigger
- Curved to be more ergonomic, smaller diameter fits better in hand palm & be optimum balanced
- Handle with Thermo-Plastic Rubber injected in housing for a durable & comfortable grip
- 360° swivel air inlet

BENEFITS
- Most powerful tool on the market in its class: 922 ft.lbs-1250 Nm of maximum real torque in reverse
- Lightweight due to composite housing
- Smooth Forward / Reverse Switch on back
- Suited for all maintenance applications: Light vehicle tire changing, general maintenance on vehicles and MRO applications

1/2" IMPACT WRENCH

FEATURES
- Impact wrench for general maintenance with ring retainer
- DYNA-PACT (Pin clutch) with oil bath
- One-handed reverse button with 4 positive power settings
- Compact & ergonomic with rubber grip
- Through handle air exhaust and 360° air inlet swivel
- Kit includes 5 socket: 14, 16, 17, 19, 22mm

BENEFITS
- General Maintenance
- Clutch delivers smooth & comfortable operation
- Robust housing & oil bath clutch provide durability
- Versatile tool ideal for all general repairs

XCALIBUR INVERTER MIG WELDER

The XCALIBUR X3i Mig Welder is a high performance portable mig welder which can also be used for DC Tig Welding and MMA.

The powerful 200 Amp output can be used to Mig Weld a range of materials including:

Steel, stainless steel, aluminium, MIG BRAZING & flux cored wire.

Inverter power & digital control for low input current. Requires only 16 Amp Fused supply at full power output. Will operate from a generator supply of 230V.

Ideal for bodyshop & automotive workshops, site repair & fabrication

This machine is ideal for DC Tig welding or welding with coated electrodes (MMA) DC Tig will precision weld steel & stainless steel with a great finish

Input Voltage/Fuse Rating: 230V 50Hz/16 Amp
Current Range: 25-200A (MIG)/10-200A (TIG)/10-170A (MMA)
Duty Cycle: 200A@ 25% (MIG)

UNIPART AUTOMOTIVE Garage Equipment Services

3.5 TONNE HYDRAULIC TWO-POST LIFT

The RRYSGL35-3 is the most cost-effective entrance into the world of hydraulic 2 post lifts. Compact dimensions, 3 stage supporting arm design and an ergonomic control allow for efficient operation in the car repair shop.

Features include:

- Ground guided bearing cables ensure even lifting and lowering.
- The mechanical safety latch integrated on both columns locks the lift carriage in position in emergency situations and thus ensures maximum safety.
- The electro-hydraulic design provides for low noise and effective work.
- Each lifting column features a maintenance-free high pressure cylinder.
- The lifting arms are automatically locked in position during the raising operation. Once the lift has been completely lowered, this interlock is automatically released. The very narrow spacing between the locking positions and a manual unlocking function enhance the ease of use and ensures compliance with CE standard EN1493.
- Low column height Perfect in case of low ceiling buildings.

3.5, 4.0 AND 5.0 TONNE BASELESS HYDRAULIC TWO-POST LIFTS

Electro-hydraulic, SPL series, two-post lifts can be adapted to fit the application and available space. The design of the posts and lifting arms also provides a spacious work area.

Features include:

- Low operating costs – minimum energy usage - one electric motor for lifting and gravity lowering.
- Non load bearing cables ensure even lifting and lowering.
- The mechanical safety latch integrated on both columns locks the lift carriage in position in emergency situations and thus ensures maximum safety.
- The electro-hydraulic design provides for low noise and efficient operation.
- Each lifting column features a maintenance-free high pressure cylinder.
- The lifting arms are automatically locked in position during the raising operation. Once the lift has been completely lowered, this interlock is automatically released. The very narrow spacing between the locking positions and a manual unlocking function enhance the ease of use and ensures compliance with CE standard EN1493.
- An upper limit bar prevents the vehicle from being lifted too high. This feature protects taller vehicles from being damaged.
- The base frame free design eliminates the risk of trip hazards on the workshop floor and eases use of transmission jacks and waste oil drainers.

BAELZ FUEL TANK DRAINERS

The range of Mobile Fuel Retrievers is designed to facilitate the draining of vehicle fuel tanks in accordance with the Health & Safety at Work Act as laid down by the factory inspectorate for the safe transfer of fuel.
These units allow one person to empty vehicle fuel tanks, (or other types of container), of all their contents without the fuel ever being exposed to the atmosphere. Leaded or unleaded petrol, and diesel, can be removed and replaced quickly, easily - and above all, safely. All models consist of a high output reversible rotary pump with a 2.5 metre suction/delivery hose mounted on a robust, highly manoeuvrable steel tank with wheels and castors.

- Finished in safety red
- Safety warning labels
- Lockable shut-off valve (cable at extra cost)
- Anti-fl ash protection in hose & pump
- Non-spark wheels & castors
- Castor with brake
- Earthing leads
- Vapour transfer tube
- Contents sight gauge
- 80 mesh strainers at pump inlet & outlet

MFR2 IS A TWIN TANK UNIT FOR UNLEADED AND LRP/ LEADED OR DIESEL FUEL; MFR3 IS A TRIPLE TANK UNIT FOR UNLEADED, LRP/LEADED AND DIESEL; BOTH MODELS ALLOW THE FUELS TO BE HANDLED SIMULTANEOUSLY WITHOUT FEAR OF CROSS CONTAMINATION.

LEASING FACTS

As a garage business, where do you see yourself in 5 years time?

For any business to grow & develop it is imperative that you offer your customers the highest level of service and become so much better than your competitors.

Without doubt, having the most reliable, modern and up to date equipment is vital to the wellbeing of your company.

Good equipment portrays the right image to your customers. It demonstrates to them that you are prepared to invest in the equipment that ultimately keeps their vehicle in the condition that they come to expect. Remember for most customers their car is the second biggest investment.

LEASING

Having your equipment on a lease facility gives you the ability to invest in your business without having to part with large capital outlay.

Most garages large and small lease their equipment rather than tie-up their hard earned working capital.

For more information on leasing please call our leasing partner Alliance & General Leasing Ltd for a free brochure.

02476 220000

ALLIANCE & GENERAL LEASING LIMITED

LEASING OFFERS MANY BENEFITS:

- ***NIL DEPOSIT:*** Ensures a healthy cash flow.
- ***VAT*** not paid up front but only charged on each monthly payment.
- ***TAX RELIEF:*** All payments are 100% fully deductible for taxation purposes for the full duration of the lease.
- ***FIXED PAYMENTS:*** Monthly payments are guaranteed NOT to increase regardless of interest rate fluctuations. A hedge against inflation

And if you are worried about "*what happens at the end of the lease term*" we will ensure that you own the equipment for just a small nominal payment.

Do not wait until you can afford to pay cash for your equipment....it might be too late. Invest now and for the future and don't forget interest rates will never be cheaper. Remember....the best place to keep your hard earned cash is in your business.

KÄRCHER®
makes a difference

YOU KNOW IT'S CLEANER

Hot water high-pressure cleaners heat water from about 12 °C to as much as 155 °C. This allows the working pressure, cleaning time and detergent quantity to be reduced. Cleaning with hot water therefore offers numerous options for optimising the cleaning process, as well as impressive advantages.

Advantage: Better cleaning result
Hot water softens congealed oil and grease and significantly improves emulsification, making it very easy to remove. In the food industry, proteins and greases can be loosened easily and quickly with hot water.

Advantage: Reduced detergent consumption
Grease, oil, resin etc. can usually be removed with just hot water, so significantly less detergent is needed. In addition to cost savings, this protects the environment and conserves resources.

Advantage: Shorter drying time
Surfaces cleaned with hot water dry more quickly, reducing likelihood of re-soiling and making them ready for reuse more quickly.

Advantage: Improved hygiene
Cleaning with hot water significantly reduces germs. For many applications where hygiene is required, this effective germ reduction without disinfectant is fully sufficient.

Advantage: Shorter working time
Hot water loosens dirt more quickly, resulting in significant time savings of up to 35%. This means that a wide range of cleaning tasks can be carried out economically and cost-effectively.

A NEW CV WORKSHOP

Something you may have been considering?

GES total service package provides specialist advice on commercial vehicle layouts, adherence to legislation and full installation procedures, all managed within a customer's timetable and budget requirements.

GES can provide a specialist one-stop-shop business solution, delivering a full consultation process to customers from 'concept to reality'.

GES offer the total package.

- **We take care of design, planning and legislation concerns**
- **We optimise the layout and provide full installation**
- **We keep to your timescale and budget**
- **Full project management from conception to completion**
- **Quality branded products with manufacturer warranties**
- **Flexible payment plans**

GES has a vast portfolio of branded products, which ensures it can live up to its claim of being able to source everything from a spanner to spray booth.
Most major items of capital equipment will be installed by the manufacturer's own trained engineers. Smaller equipment (new or existing) can be fitted, re-sited and renovated as necessary, using our own network of approved installers. GES work with architects, planners and you, to create the best arrangement for your business, whatever it's size and potential.

- **Workshop size related to vehicle throughput**
- **Equipment and storage specifications**
- **Height restrictions on lifts plus concrete and floor strengths**
- **Electrical consumption and rates**

UNIPART AUTOMOTIVE

Introducing Unipart Workshop

The ultimate source of technical data

FREE 28 DAY TRIAL & LIVE DEMO

Locating the right vehicle has never been easier. Simply enter either the vehicle registration or VIN to access full OE equivalent technical data.

Vehicle registration lookup	Industry leading VRM Lookup – including engine code and VIN
OE service bulletins	Technical service bulletins – known faults sourced from over 40 vehicle manufacturers
Tyre data	Fitment options, pressures, size, speed rating, load index and TPMS resets
Technical drawings	Exploded technical drawings of components
Maintenance	Service schedules, service procedures and service reset
EOBD	European On Board Diagnostic port locations
Procedures	Step-by-step procedures covering a wide range of common tasks
Lubricants and fluids	Capacities and types
Electrical	Detailed wiring diagrams
Fault diagnosis	Guided fault diagnosis, fault codes, component, fuse and relay location

- Search for technical data by registration or VIN
- Over 63 million records so you're guaranteed an accurate match
- Truck tech data also available
- Build a comprehensive repair quote using OE repair times with Unipart parts and retail pricing
- Free UK based technical support by telephone or email

THESE FACTS COULD LEAVE YOU FEELING COLD

REVEALED

BEST ON TEST

UNIPART AUTOMOTIVE

Competitor R134a

AIR CONDITIONING GAS

Regulations. Contrary to common belief they aren't always dreamt up by meticulous, clipboard holding and stereotypically bland jobsworths! They are genuinely there to protect you... which is why they should matter.

At Unipart Automotive we try to make sure you're protected. Take for example AC Gas legal requirements surrounding HFCs (including 134a) to comply with F-Gas regulations. Bit of a mouthful..... Lets play spot the difference to explain:

Unipart R134a	Competitor R134a
✔ Clear safety labels affixed to cylinder - important requirement of various regulations	✘ Lacking safety labels affixed to the cylinder - non compliant
✔ Comply with F-Gas legislation 842/2006 which has been in force since 2007 - all main European suppliers of refrigerants comply	✘ Neither cylinder or box state: "Contains fluorinated greenhouse gas covered by the Kyoto Protocol" - non compliant with F-Gas legislation 842/2006
✔ Hazardous pictogram clearly visible as required by CLP/REACH	✘ Hazardous pictogram not present - non compliant with CLP/REACH
✔ Emergency telephone number on box and cylinder	✘ No emergency telephone number on box or cylinder

Why should it matter?

The absence of any labelling on the product means it does not comply with EU regulations - put another way, it's not fit for sale. As a garage you have a duty of care to your employees to ensure they are aware of what they are handling. In the case of cylinders in boxes, this also applies to the cylinder inside as the two can be detached. In the event of an accident, these issues inevitably escalate, and ignorance of the requirements is no defence in the eyes of the law.

PROTECT YOURSELF AND YOUR STAFF - SLEEP EASY

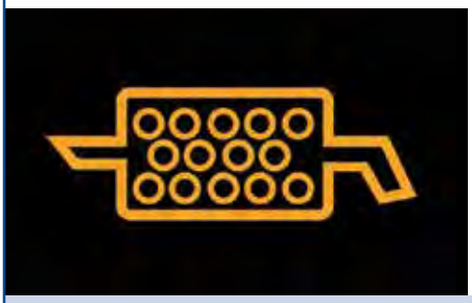
CLOGGED DPF?

UNIPART AUTOMOTIVE HAS THE SOLUTION



"The yellow 'engine block' light has illuminated on my diesel during a 300 mile trip to Cornwall ... My local dealer says it needs a new particulate filter and the cost is £2,500. This seems excessive, is there any alternative to such a cost?" **(Rob, 2nd December 2013 - www.honestjohn.co.uk)**

With the change in MOT legislation from February 2014, the option of removing the DPF is no longer a legal solution.

But DON'T PANIC, Unipart Automotive has the solution…

meet our **DPF Refurbishment Service**

We've teamed up with Ceramex to offer a professional refurbishment service that can return the existing DPF to fully operational performance by removing both the soot AND ash that has accumulated in the filter.

Simply remove the DPF from the vehicle and call your local Unipart Automotive branch. That's it!

We collect the old part, and despatch it to the nearest Ceramex refurbishment centre for treatment. Once refurbished, the DPF is sent directly to you within 3 working days. Keeping your customers on the road… and on the right side of the law.

Here's what a few of our customers had to say about it...

Kirk at Carters Car Care Ltd (Dorking) said
"Before Unipart's DPF Refurbishment Service we didn't get involved, OEM DPFs cost too much for the customer. But, now with the refurbishment service we've done 6x DPF cleans in just under 2 months, and every single one has been delivered back within 3 working days. I would definitely recommend it."

Russell at Toyotech (Salfords) said
"Our customers really appreciate the report form, it clearly shows part performance before and after the refurbishment. We had been cleaning DPFs onsite with reasonable success, but having now done half a dozen through Unipart we see no need to go back to the old way."

Call 0121 329 1154 or visit www.ges.eu.com

Diesel Particulate Filter (DPF) Refurbishment Service

To complement our rapidly growing range of DPFs covering 190 model applications, Unipart Automotive has teamed up with Ceramex to offer you Xpurge ® - a patented DPF cleaning technology which provides world class cleaning performance using an environmentally friendly, chemical free process.

Ceramex has over 15 years experience in the CV sector, and has extended this expertise to cover car, LCV, coaches and even agricultural and industrial equipment.

Why Refurbish?

- ✓ Cost effective solution over an expensive new unit
- ✓ Keep your original filter - reduced risk of fitment issues
- ✓ A filter condition report is provided with every clean detailing the reduction in particulate matter and improvement in airflow through the unit - add to the vehicle service history to demonstrate filter condition
- ✓ Service available for ANY car and LCV application fitted with a DPF - refurbished and returned within 3 working days

SKF

SUPPLIED BY

UNIPART AUTOMOTIVE

All the right parts, all in one box

A complete repair, for complete customer satisfaction

Vehicle Manufacturers recommend that Timing Belts are changed at certain intervals as they play a critical role in the function of your engine. The Water Pump should be replaced at the same time to avoid problems such as a collapse of the impeller.

- 1-stop supplier, one warranty
- 100% OE quality parts in the box
- SKF AquaMax Water Pump
- 2 Year Warranty

Don't gamble with your reputation, install confidence with SKF Automotive Kits.

Available nationwide from Unipart Automotive.

Extended Range

Timing Belt Kits with Water Pumps

- Time & Cost-saving
- One - Kit Solution

Top 25 KITS

85%+ Market Coverage

2 YEAR WARRANTY

Unipart Automotive offer a full product & training support service, to communicate the features and benefits of the SKF range to your business. Call us today for further information: 0121 329 1051

Engine drive systems

SKF

Install confidence

Timing drive system

	New SKF components	Worn/damaged components	Failures resulting in engine break down
1 Camshaft seals 2 Crankshaft seal			A damaged seal will leak oil/fluids and contaminate belts, tensioners and idlers. Leading to component failure.
3 Idler pulley			Bearing ball race destroyed leading to excessive endplay resulting in belt run out. Over tension leads to early bearing failure.
4 Manual belt tensioner			Life expired – sign: Corrosion, rough rotation and noise coming from the tensioner. Leading to tensioner failure.
4 Automatic belt tensioner			Unit is clearly life expired. Internal components that provide the tension control are probably also worn. A deformed/cracked belt track will lead to belt run out, plus vibrations.
5 Timing belt			Contamination from coolant, oil or other petroleum derivative, due to leaking seals. Leading to belt deterioration and failure.
6 Water pump pulley			Life expired – sign: Corrosion and belt rubber residue on the pump. Leading to functioning problems – possible bearing failure that will overheat the engine.

PCL AIR

NEXUS NITROGEN GENERATOR & BUILT-IN INFLATOR

Features:

- Modern 21st Century design
- Super-fast N2 generation from PSA filtration technology
- Modern ball valves and fittings
- Mobile with 90mm castors for superior movement and flexibility
- N2 purity check point
- Internal tanks meet CE standards
- Easy to operate and quick installation – plug and play!
- Electronic preset tyre inflation
- Automatic flat tyre detection

Benefits:

- Revenue generation for Tyre Service Providers charging for Nitrogen inflation.

EXAMPLE SCENARIO

Average cost per (car) tyre to inflate with Nitrogen: £1.50

Total Tyres changed per week: 200

No of customers choosing Nitrogen: 50% (100 tyres)

52 weeks per year

EXAMPLE ANNUAL REVENUE: £7,800

- Both Nitrogen fill and Air to Nitrogen conversion service for up to 4 tyres at once
- Low life time costs - with high grade filtration and high performance components
- Guaranteed accuracy and robustness with ceramic pressure sensor
- Lease payment options available
- Installation, maintenance and extended warranty options available

Part No	Description	Max Flow Rate	Application	Price	5YR Lease Per Week
PCLNEX2IA02	NEXUS Passenger Car Nitrogen Generator/ inflator	70 l/min		**£1499**	**£7.87**

HOFMANN®

THIS IS NOT A SALES EVENT!

WHEEL ALIGNMENT SEMINAR

HOFMANN invites you to attend a comprehensive seminar on wheel alignment, open to all technicians. The seminar is designed to appeal to every level of technician and includes:

- The fundamentals of 4 wheel alignment
- 4 wheel alignment and tracking
- Why wheel alignment?
- Camber definition
- Caster definition
- Steering axis inclination
- Total toe
- Thrust angle
- Turning radius
- Setback
- Making wheel alignment a profitable business

Our seminar is designed to help keep technicians informed of the latest developments in the industry. You don't have to own a HOFMANN wheel alignment system to attend – you just need to be interested in your business!

Seminars are held at various locations between the hours of 7pm-9pm

TICKET PRICE - £45

Refreshments included

TO BOOK YOUR PLACE
and find out about the next seminar near you
CALL 0121 329 1154

HOFMANN®

JUST LOOK AT THE BENEFITS OF WHEEL ALIGNMENT TO YOUR BUSINESS!

PLACES ARE LIMITED AND SELLING FAST, DON'T MISS OUT ON THIS ESSENTIAL SEMINAR.
